

TWO-WAY RADIOS IN FACILITIES AND INDUSTRIAL

Manufacturing, Warehouse, Storage and Distribution Centers

When it comes to production or facilities operations, unexpected stops or downtime can severely damage efficiency and create enormous cost overruns. The best way to avoid these issues is with an effective communications solution.

By connecting workers in real-time, the flow of information is quick, effective, and seamless. Workers can communicate vital needs and concerns without interrupting the pace of their workflow. Ensuring that key staff members are able to quickly communicate keeps everything operating at their peak.

Many of your departments and staff can immediately benefit from simple, easy to use and powerful 2 way radio equipment. Whether its shipping, receiving, line workers, supervisors, maintenance, quality control, engineering, customer service, security, or loss prevention staff members, each can benefit from by staying mobile and efficient and not having to drop what they are doing to search for a to communicate.

Benefits of Employee Radio Communications:

- Improve Assembly Line Operations
- Quickly Request Help & Supplies
- Maximize Output, sales, and Profit
- Expedite Requests and Rush Orders
- Instantly React to Inquiries or Emergencies
- Critical for Disaster Preparedness
- Increase Safety and Security

Radios consistently rank higher than other solutions.

Paging:

Paging is only a one-way communication and many times purposefully or accidentally tuned out. In addition, the response is often delayed.

Phone systems:

Standard phone systems only allow talking to one worker at a time. Often phones are not strategically located within easy reach of a worker's assigned area. Unless the worker is waiting right next to a phone, calls are often missed and left ringing for all to hear. This can often cause a backup on voice mails, yet another possible opportunity to backup and lose contact. By the time all is said and done when the worker is able to respond, it is often just too late.

Cell Phones:

Cellular technology, although very portable, often comes with significant monthly expenses. These can range well into the hundreds of dollars per worker annually. These also have many limitations caused by poor coverage in buildings and again only connect with one worker at a time.

Consumer Walkie-Talkies

Consumer Walkie Talkies are not durable and just not made for normal business environments. Warehouses, stock facilities, factories and industrial locations are notoriously hard on equipment and commercial walkie talkies are not build to handle it. With their wide-use among families, they also pose an increased risk of interference when trying to communicate important business.

Commercial, industrial grade 2 way radios can help solve many communication challenges. Also, purchasing is not the only option. For many needs long term renting can offer cost effective and comprehensive solutions for your company. Call EventTone and speak with one of our representatives. We'll be happy to help you find the answers.
