

City and State Wide Repeater Coverage

The Most Dependable City & Statewide Coverage On the East Coast

EventTone Wireless partners with the largest digital P2T (Push-to-Talk) radio network on the East Coast. Our wide area digital coverage spans throughout New York, New Jersey and parts of Connecticut. Our Motorola Connect Plus system includes over 50 linked sites with enhanced roaming features enabling you to be in constant communication with your fleet, no matter where your business takes you.

Connect Plus

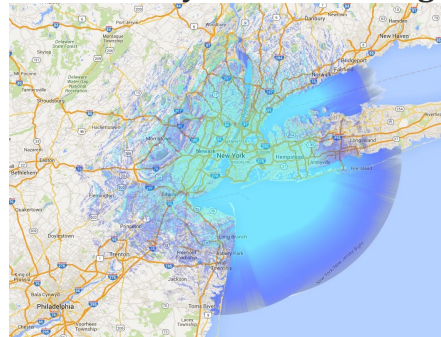

We understand that you need communications where you do business. That is why we have strategically constructed over 50 sites across New York and New Jersey. Our system provides roaming capability between our sites to deliver wide area coverage for your multi-location or fleet-based business. With high quality voice and data communication, our Push to Talk Radio Network simply and affordably bridges the communications gap between fleets and employees.

Need Guaranteed Coverage?

Our sites have been the backbone for reliable communication during natural disasters including Hurricane Sandy. Battery backups at all sites allow for continued communication, up to 96 hours of up-time in the event of power outages. Additionally, our network is primarily linked via Microwave dishes with the additional redundancy of land based Broadband Fiber Optic/Cable connections. You can feel safe knowing that our Push to Talk Radio Network will be there to keep you talking when Cellular based Push to Talk won't.
